(*i*) that the candidate is not enrolled in the Municipal Electoral Roll as a voter, or

(*ii*) that the candidate is disqualified for being a commissioner for any of the reasons set forth in section 57 of the Act, or

(*iii*) that a proposer or seconder is disqualified from subscribing a nomination paper, or

(*iv*) that the candidate's nomination paper does not comply with the provisions of rule 23,

(*v*) that the signature of the candidate or any proposer or seconder is not genuine or has been obtained by fraud.

(2) Nothing contained in clause (*iii*), clause (*iv*) or clause (*v*) of sub-rule (*1*) shall be deemed to authorise the rejection of the nomination of any candidate on the ground of any irregularity in respect of a nomination paper, if the candidate has been duly nominated by means of another nomination paper in respect of which no irregularity has been committed.

30. The Chairman (or such other person authorised by him in this behalf in case he fails to attend) shall endorse on each nomination paper his decision accepting or rejecting the same, and if the nomination paper is rejected shall record in writing in brief his reasons for such rejection.

31. Any candidate may withdraw his candidature by notice in writing subscribed by him within seven days of the date of scrutiny of nominations. A candidate who has withdrawn his candidature shall not be allowed to cancel the withdrawal or to be re-nominated as a candidate for the same election.

32. The Chairman shall, on receiving a notice of withdrawal under rule 31, as soon as may be, cause a notice of withdrawal to be affixed in some conspicuous place in his office as well as in the ward to which the matter relates.

33 On completion of the scrutiny of nomination and after the expiry of the period within which candidatures may be withdrawn under rule 31, the Chairman shall forthwith prepare a list of valid nominations and cause the same to be affixed in some conspicuous place in his office and shall, in the manner indicated in section 354 of the Act, give notice thereof and also of the time and place at which and the hours between which the poll for each ward will be held.

34. If a candidate who has been duly nominated dies after the date appointed for the scrutiny of nominations, and before the date appointed for the taking of a poll, the Chairman shall, upon being satisfied of the fact of the death of a candidate, countermand the poll and report the fact to the Magistrate, and all proceedings with reference to the election shall be commenced anew in all respects as for a bye-election :

Provided that no fresh nomination shall be necessary in the case of a candidate who stood duly nominated at the time of the countermanding of the poll.

35. (*1*) If the number of candidates in a ward who are duly nominated and who have not withdrawn their candidature in the manner and within the time specified in these rules exceeds that of the vacancies in the ward a poll shall be taken within that ward.

(*2*) If the number of such candidates is equal to the number of vacancies, the Chairman shall declare all such candidates to be duly elected and report accordingly to the Magistrate.

(*3*) If the number of such candidates is less than the number of vacancies, all such candidates, if any, shall be declared to be elected.

36. The duties conferred on the Chairman by rules 23, 24, 26, 28, 29, 30 and 32 shall be performed by the Magistrate or any other persons authorised by him with regard to the election of the ward or wards in which the Chairman of the Municipality is a candidate.

Voting.

37. The Magistrate shall appoint a Presiding Officer for each polling station and such other persons (herein after referred to as "*Polling* Officers") to assist the Presiding Officer, as he thinks necessary : provided that no person who is a candidate for the election shall be appointed Presiding or Polling Officer.

38. If the Presiding Officer for any reason fail to attend, the Magistrate shall appoint another fit and proper person, who is not himself a candidate for election, to take his place.

39. It shall be the duty of the Presiding and Polling Officers to see that votes are recorded with the utmost secrecy, that the number on the voting paper handed over to a voter is not divulged to any candidate or his agent, that only such persons as may be admitted to the polling booth are admitted thereto, and that persons, who have recorded their votes, or against whom objections have been heard and allowed, leave immediately. It shall also be their duty to see that these rules and any special directions given by the Magistrate thereunder are strictly observed.

40. (*1*) The Presiding Officer shall keep order at the polling station, shall see that the election is fairly conducted, shall regulate the number of electors to be admitted at one time, and shall exclude all other persons except—

(*a*) the Polling Officers, the candidates, and one agent of each candidate (herein after referred to as the "Polling Agent") appointed in writing by the candidate ;

(*b*) the police or other public servants on duty ; and

(*c*) such other persons as the Presiding Officer may from time to time admit for the purpose of identifying voters.

(*2*) The Presiding Officer shall close the polling station at the hour appointed in that behalf under rule 33 so as to prevent the admission therein of any voter after that hour : provided that all voters present within the enclosure of the polling station before it is closed shall be entitled to have their votes recorded.

41. Each polling station shall be furnished with such number of compartments in which voters can record their votes screened from observation, as the Magistrate thinks necessary.

42. (*a*) The Chairman shall provide at the polling station in each ward materials sufficient for the purpose of enabling voters to mark the ballot papers, a sufficient number of printed ballot papers, as many ballot boxes as may be necessary, and copies of the electoral roll or of such part thereof as contains the names of the voters entitled to vote at such station.

(*b*) The official mark for stamping ballot papers shall be designed and prepared by the Magistrate and shall be kept secret by him and made over to the Presiding Officers before the polling.

43. Every ballot box shall be so constructed that the ballot paper can be introduced therein, but cannot be withdrawn therefrom, without the box being unlocked. The Presiding Officer at any polling station, immediately before the commencement of the poll, shall show the ballot box empty to such persons as may be present in such station, so that they may see that it is empty, and shall then lock it up, and place his seal upon it in such manner as to prevent its being opened without breaking such seal, and shall place it within his sight for the receipt of ballot papers and keep it so locked and sealed.

44. Before the polling station in a ward is open for the recording of votes the Presiding Officer shall read to such persons as may be present the provisions of section 14 of the Indian Election Offences and Inquiries Act, 1920, and shall explain the substance thereof in the vernacular of the district.

45. Votes shall be given by ballot in person and no votes shall be received by proxy.

46. Each voter shall be entitled to vote for the ward in which he ordinarily resides, and for no other, and to give as many votes as there are vacancies for such ward : provided that he must not give more than one vote to any one candidate.

47. The candidates and their agents shall not speak to or address any intending voter within the polling booth in a polling station but may submit to the Presiding Officer objections to a voter on the following grounds :—

First—that his name is not on the electoral roll of the ward in respect of which the election is being held.

Second—that his claim to be a certain voter shown on the electoral roll is false.

Third—that he has already voted.

Such objection shall be summarily decided by the Presiding Officer who may for this purpose obtain such evidence as may be available on the spot.

48. Immediately before a ballot paper is delivered to an intending voter entering the polling booth, he will be asked to state his name and description, and the ballot paper shall then be marked on the back with the official mark and the number of the voter shall be entered on the counterfoil, and a mark shall be placed in a copy of the electoral roll against the number of the voter to denote that he has received a ballot paper, but without showing the particular ballot paper which the voter has received. On the counterfoil shall be entered the name of the ward.

49. The voter on receiving the ballot paper shall forthwith be directed by the Polling or the Presiding Officer, as the case may be, to proceed into one of the compartments in the polling station, and there shall make a mark on the ballot paper against the name of the candidate or candidates for whom he intends to vote in accordence with the instructions set out on the back of the outerfoil paper, and fold it up so as to conceal his vote, and, after showing to the Presiding or the Polling Officer, as the case may be, the official mark, shall put his ballot paper, so folded up, into the ballot box. Every voter shall vote without undue delay and shall quit the polling station as soon as he has put his ballot paper into the ballot box.

50. If the voter, owing to illiteracy or infirmity, is unable to read a ballot paper or to make a mark thereon, the Presiding Officer shall mark the vote in the ballot paper according to the direction of the voter. The voter shall then himself, or with the assistance of the Presiding Officer, put the ballot paper folded up into the ballot box.

51. At any time before a ballot paper is delivered to a voter the Presiding Officer or the Polling Officer may, of his own accord, if he has reason to doubt the identity of the voter or his right to vote at such station and shall, if so required by a candidate or polling agent, put to the voter the following questions :—

(*1*) Are you the person enrolled as follows (reading the whole entry from the roll) ? and

(*2*) have you already voted at the present election in this or any other ward in the capacity in which you now appear ?

and the voter shall not be supplied with a ballot paper if he refuses to answer any one of the questions and unless he answers the first question in the affirmative and the second question in the nagative.

52. The ballot paper shall be printed by the Chairman in English or Bengali in Form III annexed to these rules and shall contain the names of the candidates arranged alphabetically in the order of their surnames. The ballot paper shall be serially numbered, the serial number being printed on the face of the counterfoil and on the back of the ballot paper.

53. If a person representing himself to be a particular voter named on the electoral roll applies for a ballot paper after another person has voted as such voter, the applicant

shall after duly answering such question as the Presiding Officer may ask be entitled to mark a ballot paper in the same manner as any other voter. Such ballot paper (hereinafter referred to as "tendered ballot paper") shall be of a colour different from the other ballot papers and instead of being put into the ballot box shall be given to the Presiding Officer and endorsed by him with the name of the voter and his number on the electoral roll and the name of the ward to which the roll relates and shall be kept in a separate packet and shall not be counted. The name of the voter, his number on the electoral roll and the name of the ward to which the roll relates shall be entered in a list in Form IV annexed to these rules, which shall bear the heading "*Tendered votes list.*" The person tendering such ballot paper shall sign his name and address thereon or affix his thumb impression against the entry in that list.

54. If any candidate or polling agent declares and undertakes to prove that any person by applying for a ballot paper has committed the offence of personation, the Presiding Officer may require such person to enter in the list of challenged votes (which shall be in Form V annexed to these rules) his name and address or if he is unable to write to affix his thumb impression thereto and may further require such person to produce evidence of identification. If such person on being questioned in the manner provided in rule 51 answers the first question in the affirmative and the other question in the negative he shall be allowed to vote after he has been informed of the penalt for personation. The Presiding Officer shall make a note of the circumstances and of his decision on the list of challenged votes.

55. A voter who has inadvertently dealt with his ballot paper in such a manner that it cannot conveniently be used as a ballot paper may, on delivering it to the Presiding or the Polling Officer, as the case may be, and satisfying him of the inadvertence obtain another ballot paper in place of the spoilt paper, and the latter shall, together with its counterfoil, be marked as cancelled.

56. A Presiding Officer, Polling Officer or Polling Agent who is on duty at a polling station at which he is not entitled to vote shall, if he is certified by the Chairman to be entitled to vote at the election for the ward in connection with which he is employed or for any other ward, be allowed to record his vote at that polling station. The name of the polling station at which he would otherwise have been entitled to vote shall be entered in the counterfoil of the ballot paper together with his number in the electoral roll for the ward in which that polling station is situated.

57. Such ballot paper shall be placed in an envelope and sealed by the Presiding Officer or the Polling Officer as the case may be and returned with the certificate referred to in the preceding rule to the Presiding Officer of the polling station concerned and the latter officer shall cause such vote to be included among the other votes.

58. On the conclusion of the poll the ballot box shall be opened and the votes counted in the presence of the candidates or their agents by the Presiding Officer with the assistance of the Polling Officers, and the Presiding Officer shall then and there declare subject to the provisions of rules 59 and 60 the result of the election and report accordingly to the Magistrate, who shall thereupon forward to the Divisional Commissioner a list of duly returned candidates for the whole municipality for publication by him in the *Calcutta Gazette*. The Presiding Officer shall also seal up the book of counterfoils and unused foil of voting papers and make it over to the Magistrate who shall keep it sealed in his own custody till it is destroyed under rule 63.

59. Any voting paper which is not duly marked with the official mark or on which more than one cross is placed against any candidate's name, or on which votes are given to more candidates than there are vacancies or on which a cross or mark is placed in such a manner as to make it doubtful to which candidate it has been given or on which any mark is made by which the voter may afterwards be identified shall be invalid.

60. If there be an equality of votes for the same vacancy, and if the number of vacancies does not admit of all the candidates who have obtained an equal number of votes being elected, the selection of one of the candidates shall be made by lot to be drawn by the Presiding Officer in such manner as he may determine.

61. (*1*) If any person is elected by more than one ward he shall by notice in writing signed by him and delivered to the Chairman within five days of the last date of the general election in the Municipality choose the ward which he shall serve and the choice shall be conclusive.

(*2*) When any such choice has been made the Chairman shall as soon as practicable call upon the ward or wards which such person has not chosen to serve to elect another person or persons in a bye-election.

(*3*) If the candidate does not make the choice referred to in sub-rule (*1*), the Chairman shall forthwith declare the ward which such person shall serve and shall as soon as practicable call upon the other ward or wards concerned to elect another person or persons in a bye-election.

62. When the voting papers have been scrutinised and counted, they shall forthwith be replaced in the ballot box from which they were taken out, and the box, after being locked and sealed with the official mark, shall be sent by the Presiding Officer to the Magistrate who shall keep the same in safe custody.

63. The packets of ballot papers and of tendered votes shall be retained for one year and shall thereafter be destroyed subject to any direction to the contrary made by the District Magistrate, or by a competent Court.

General.

64. All disputes arising under these rules shall be decided by the Magistrate and his decision shall be final. If he finds any material irregularity prejudicing the election, he may declare the election void and order a fresh election.

65. No person in the employment or pay of the Municipality shall, directly or indirectly, engage in canvassing for votes or otherwise assist in the election of any candidate, otherwise than by giving his own vote. Any breach of this rule will render him liable to dismissal.

66. All costs incurred in the preparation of the electoral roll, the publication of notices, the holding of election, or any other necessary action under these rules shall be payable by the Commissioners out of the Municipal Fund.

Lat. 22° 12′ 37″ N., Long. 114° 15′ 30″ E., on chart No. 1466.

Call signal.—VPS.

Wave length.—450 and 800 metres.

Details.—Ships requiring bearings should call this directional finding station in accordance with the procedure outlined below, and the latter will reply giving the true bearing of the ship from the station, expressed in degrees (000°—359°).

The D-F station maintains continuous watch on the 600 metres wave ; bearings however will be taken either on 450 or 800 metres, as requested, and the reply transmitted on 600 metres.

The following signals are to be used :—

Signal.	Meaning.
QTE.	What is my true bearing from you ?
QTE.	Your true bearing from me was.....degrees.

Example.—The ship calls the D-F station in the usual manner on the 600 metres wave, making QTE ? in conjunction with the call signal of the station from which the bearing is required, followed by the figures 450 or 800, signifying that she will change to either the 450 or 800 metres wave for the taking of the bearing.

The ship then awaits instructions from the D-F station, which will be transmitted on the 600 metres wave.

In order to obtain the greatest possible degree of accuracy, it is important that ships should not transmit with too much power Signals should, however, be fairly strong and clear ; great care must be exercised to keep the note and strength steady, and to pay strict attention to spacing ; the instructions should be carefully observed.

Caution.—Although the bearings taken by the D-F station can generally be considered accurate within two degrees, it must be understood that the Hongkong Government provide this service on the condition that they incur no liability for any consequences resulting directly or indirectly from any inaccuracy in the bearings given, from any failure in the service, or from any other cause whatever.

The Director of Public Works, Hongkong, will be glad to receive periodical reports from ships on the results obtained.

For the present no charge will be made for the use of this station.

RESOLUTION ON THE REPORT ON THE POLICE ADMINISTRATION IN THE BENGAL PRESIDENCY FOR THE YEAR 1923.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Police.

CALCUTTA, THE 6TH SEPTEMBER 1924.

RESOLUTION—No. 2492Pl.

READ—

The Report on the Police Administration in the Bengal Presidency for the year 1923.

1. Mr. R. B. Hyde held the office of Inspector-General of Police till the 6th August, when he went on leave preparatory to retirement. Mr. T. C. Simpson officiated in the post for the remainder of the year.

2. **Recruitment and leave.**—There was a slight reduction in the total permanent sanctioned strength of the Civil Police. At the end of the year the total sanctioned strength of the subordinate ranks was 24,038 and there were 518 vacancies. About one-third of the eighteen hundred recruits appointed as constables were local men, and as an illustration of the communal balance of recruitment it may be mentioned that 46 per cent. of these local recruits were Muhammadans. The old problem of the adjustment of leave reserve to meet leave earned is not much nearer solution, as may be judged from the position in one district where applications for leave due were pending from 325 men, or 20 per cent. of the district force at the end of the year. Poor health accounts for part of the pressure of leave, and the admitted inadequacy of equipment and barrack accommodation for the lower ranks does not encourage much expectation of any general improvement in the physical condition of the force.

3. **Discipline.**—It is not of itself any cause for satisfaction to record that the number of departmental punishments rose from 8,855 to 10,065 and that 20 officers and 406 men were dismissed for misconduct during the year; but these figures are evidence of the genuineness of the endeavour made to maintain a proper standard of discipline Nine cases out of every ten brought by private individuals against police officers in the criminal courts ended in acquittal or discharge; and the fact may reasonably be taken to give some indication of the degree to which police subordinates are harrassed by unnecessary and often frivolous prosecutions. The majority of the forty-two cases which ended in conviction were of a petty nature, but there remains a small residue of convictions for extortion, wrongful confinement, and assault, which show that the old evils are not yet finally eradicated from the lower ranks. There was again no conviction on a charge of torture.

4. **Retrenchment.**—It is now possible to take stock of the general effect on the police administration of economies effected since the publication of the Retrenchment Committee's report. It must be recognised that these measures have in some cases at least resulted directly or indirectly in lowering the standard of police efficiency because funds cannot be found to maintain the level previously aimed at. Gazetted officers have been withdrawn from several subdivisional charges and Additional Superintendents of Police from two districts in which they were previously considered necessary. The Criminal Investigation Department and the Intelligence Branch have been placed under the supervision of one Deputy Inspector-General, and the former department has lost its Criminal Tribes section.

The Police Training College is without an Assistant Principal, the Detective Training School has been abolished, and even the classes for sub-inspectors at the Training School were closed for some months, though the deplorable effect on the training of young officers necessitated reopening them. A section of the River Police has been closed down and two River Police patrol posts have been abolished, while the police force has been withdrawn from steamer stations on the large rivers. Touring by gazetted officers has been curtailed by 25 per cent., and a falling off in the percentage of convictions may be partly attributable to the inevitable parsimony of the Magistrate in watching his budget for law expenses. The rank of Deputy Superintendent is at present a closed avenue of employment except by promotion from the rank of inspector. A beginning was made during the year with the amalgamation, where possible, of rural police-stations; and opposition to this policy comes invariably not from police officers but from the local public, who are prompt enough to discover what they owe to the police when the thana is on the point of removal. There is hardly one of these administrative changes which there is any reason to welcome on its own merits, and the Police department deserve more credit than has been accorded to them for the readiness with which they have accepted measures for the reduction of expenditure which must react on the efficiency and capacity of the force.

5 **Crime Statistics.**—The year 1922 represented a peak in the statistics of serious crime, and a general downward tendency was in evidence during the year under review. This was especially marked in crimes of mob violence, and the only exceptions were increases of no great importance in the figures for note forgery and murder. Had it not been for the unrest engendered by political agitation among the Santals of the western border, which eventually necessitated the posting of additional police in the Midnapore district, the decrease in cases of rioting would have been still more marked. As it was, the number fell from 946 to 759. In only three cases were the police forced to open fire on rioters, and three deaths were caused in an affair of this kind arising out of an attack on excise officers in Bakarganj.

6. **Dacoity.**—Dacoity remains the most interesting feature in the criminology of Bengal High as the total number of dacoities committed during the year still is, viz., 612, it shows a decrease of 105 on the figure for the previous year. This is in accordance with the general tendency towards the reassertion of law and order, and perhaps reflects easier economic conditions, though the economic interpretation of the difference in one year should not be pushed too far. Comment was made in last year's resolution on the participation by young men of the *bhadralok* class in dacoities of the ordinary criminal type. This ominous development was accentuated during the year 1923, especially in Eastern Bengal. These young men are found in most cases to have played some part in former revolutionary organisations or in the non-co-operation and Khilafat movements, and only too often qualities developed by service in the Bengali regiment have been misapplied to criminal objects. In many of these cases there is no reason to believe that the motive for dacoity goes beyond that of personal gain, though it is not perhaps quite so certain as was thought last year that this alliance of *bhadralok* with professional criminals is devoid of any political significance. The Governor in Council trusts that these criminal activities on the part of youths of respectable parentage are merely a transitory phase of that period of economic unsettlement which has followed the conclusion of the war in all countries. At the same time the fact is not to be disguised that there has also been a recrudescence of specifically revolutionary crime, committed generally with the help of firearms and independently of the professional criminal. This recrudescence had begun by the end of the year to constitute once more a very real danger to the safety of Government officers and to the happiness of the better class home in Bengal.

7. **Criminal Procedure Code.**—In dealing with ordinary crime the Inspector-General of Police complains of the difficulties with which he is faced through the proclivity of the amended Code of Criminal Procedure

towards making things easier for the criminal and harder for the police, and through the inadequacy of the preventive measures when an arrest is effected. The latter difficulty is more easily remediable than the former, and the case of the confessed dacoit with twelve previous convictions who twice absconded on bail (on one occasion of Rs. 100) and is still at large, shows that there are grounds for the complaint. Volunteer defence parties have again earned commendation in the few districts in which they have been actively organised.

8. **Criminal Investigation Department.**—No noteworthy change occurred during the year in the working of the special branches of the police force except the measures of retrenchment already detailed. The Criminal Investigation Department rendered valuable assistance to the district police in important cases of dacoity and cheating, but the bulk of the Criminal Tribes work had to be transferred to the ranges. The closing of the Detective Training School has deprived the district police of the opportunity of specialised training in detective methods ; and with the exception of a few districts which have detective departments of their own, there is little scope now for improvement in the routine methods of rural investigation. This lack of trained detective talent in local police work is an obstacle in dealing with crime to which the Inspector-General draws particular attention. The limited assistance which can be given by the Criminal Investigation Department as at present constituted bears no comparison to that offered from the headquarters detective staff of a more highly organised police force.

9. **Special Police Forces.**—The curtailment of the River Police has been followed by an increase of dacoity in the riverside districts affected, but it is too early yet to draw definite conclusions. This force continued to do useful work in patrolling the rivers in criminal areas, in enforcing the Inland Steam Vessels Act, and in rescue and salvage. The Railway Police had to cope with a considerable increase in reported crime, occurring mostly on the East Indian Railway. The Eastern Frontier Rifles maintained their standard of smartness and efficiency, to which the issue of new rifles and equipment and the revival of the camp of exercise contributed.

10. **Chaukidari.**—The total number of the chaukidari decreased from 83,052 to 82,043 ; but this decrease was accompanied by a slight increase in expenditure during the year. The Inspector-General complains, however, of the unsatisfactory condition of the chaukidari, owing to the inadequacy of pay, a hardship which is accentuated by the delay which only too frequently occurs in the quarterly payments. It is a curious feature in the evolution of village government that a large proportion of the chaukidari should now consist not of Bengali villagers but of domiciled upcountrymen of low castes ; and the reason seems to lie in the unattractive character of the post. A transitional stage in which the village watch is coming under the effectual control of the union board as well as of the district police is not without its difficulties ; but the Inspector-General believes that these can be overcome by a certain amount of tact on the part of the local police officers. However ineffective it may sometimes seem, the village chaukidari is an indispensable element in the police system in Bengal and its development acquires a new interest as it becomes more and more a field for the exercise by village authorities of their own responsibilities for the prevention of crime.

11. **Finance and Policy.**—A reduction of over four lakhs of rupees was effected in the total cost of the department during the year, this amounting to Rs. 1,44,06,264 as against Rs. 1,48,31,979 in the previous year. Welcome as this financial relief is, it must be repeated that it was attained only by some lowering of standards, and by deferring measures of improvement which are essential to the proper administration of the police. These measures of improvement, in spite of their initial cost, should ultimately lead to economy by raising the standard of health in the ranks and they must be effected sooner or later if the province is to show a proper sense of responsibility for the maintenance of its police. They may be summed up in the two words Housing and Health. The inadequacy of accommodation for

the district police is a scandal which cannot possibly be justified, and the provision of waterproofs for duty in the rains, sanitary sleeping accommodation, and protection against fever are no less essential to the health of the police than good barracks. Yet the small amount demanded for a partial supply of nets and cots was recently rejected by a large majority of the legislature. The Governor in Council hopes that members of the Legislative Council will make themselves personally acquainted with the conditions in which the police in their districts are housed so that future demands for necessary improvements may be considered by those who have a first-hand knowledge of existing condition.

12. The Governor in Council has read with pleasure the list of officers whose good services have been brought to his notice, and desires to record his appreciation of the work done by all ranks during the year.

ORDER.—Ordered that copies of the resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and all Commissioners of Divisions, for information.

Ordered, also, that the resolution be published in the *Calcutta Gazette*.

13. The electoral roll thus prepared and amended shall be deemed to be the final electoral roll of persons entitled to vote at a general election and shall remain valid for three years.

Provided that for the purposes of a casual election any person whose name is not on the electoral roll may at any time apply to the Executive Officer to enter his name therein and rules 11 and 12 shall be held applicable, *mutatis mutandis* to such claim and if any such application is made not less than thirty days before a casual election it shall be decided in time for such election but not otherwise.

15. It shall not be necessary to publish the electoral roll or extracts from the roll on the occasion of a casual election provided that the roll shall at all time be open to inspection by the rate-payers and residents at the cantonment office and that all persons whose claims have been admitted under rules 9 to 14 shall be entitled to vote at such elections. The Executive Officer shall, in the case of each casual election, publish a notice stating the latest date upon which claims to be registered will be received provided that the date so fixed shall not be inconsistent with rules 9 to 14.

In the nomination paper the candidate will subscribe himself as assenting to his nomination. The Executive Officer shall not less than 18 days before the date of election scrutinise the nomination papers after giving three days' notice of the date, place and hours fixed for the purpose by publication in the Cantonment office. He shall record his decision in the form. He shall, not less than 16 days before the day fixed for election, publish a list of candidates whose nomination papers have been found valid, in the same form B at the Cantonment office, and shall, not less than seven days before the date for election, also publish a revised list of candidates in the same manner as the original list, containing

all the alterations and amendments made in such original list by order of the Commanding Officer under rule 17. The revised list thus published shall be the final list of candidates for the election.

17. Any person who applied under rule 16 and whose name is not published in the list of candidates or who disputes the claim of any other candidate to be on the list published by the Executive Officer under rule 16 may apply to the Commanding Officer of the district in writing within two days of the date of publication of the list of candidates for an order to have his name included in or any name omitted from the list, and the Commanding Officer of the district shall make such order, and the Executive Officer shall upon receipt of a copy of such order which shall be delivered to him by the Commanding Officer of the district not less than seven days before the date of election, give effect to the same, and such order shall be final.

V.—Manner of holding election.

18. The elections and casual elections shall be held on such dates as may be fixed by the Local Government and notified in the *Calcutta Gazette*.

19. In the event of the number of candidates for election in a cantonment or in any ward of it not being greater than the number of vacancies such candidates shall be deemed to be elected. If the number of candidates exceeds number of vacancies a poll shall be held.

20. The poll shall be held at such time and place as the Cantonment Authority may determine, and the place at which and the hours between which the votes will be recorded shall be notified by beat of drum, and by the publication of notices at the same time as the list of candidates is published under rule 16.

21. After the second hour mentioned in the notice referred to in rule 20 no elector shall be admitted within the building or enclosure within which the election proceedings are being held, but the votes of all duly enrolled electors who are already within the building or enclosure shall be recorded.

22. Every elector shall be entitled to vote for the ward in which he ordinarily resides, or in which he is assessed to pay the rates and for no other, and to give as many votes as there are vacancies for such ward, but he shall not give more than one vote to any one candidate.

23. The Commanding Officer of the district shall appoint a polling officer, who is not himself a candidate for election, to preside at the election at each polling centre. If the polling officer for any reason fail to attend, the Commanding Officer of the district shall appoint another fit and proper person, who is not himself a candidate for election, to take his place.

24. All votes shall be given in person and no votes shall be received by proxy or in writing.

25 On the morning of the election day the polling officer shall be supplied with a sealed ballot box provided with an aperture for receipt of voting papers, a copy of the electoral roll, and a bound book or books of voting papers serially numbered in foil and counterfoil, one voting paper for each voter entered in the roll.

26. The voting paper shall be printed in Bengali or English or both, in Form C annexed to these rules, and shall contain the names of all the candidates arranged alphabetically in the order of their surnames.

27. (*1*) On the day of the election the polling officer shall admit to the polling booth or room the candidates and such agents as may be selected by the candidates to assist in the identification of voters, provided that there shall be present at one time, in addition to the candidates, not more than one agent of each candidate.

(*2*) Besides candidates and their agents only voters and such persons (if any) as may be admissible under special directions given by the polling officer shall be admitted to the polling booth or room.

28. The candidates and their agents shall not speak to or address any intending voter in the polling booth or room, but may submit to the polling officer objections to a voter on the following three grounds :—

First.—That his name is not on the electoral roll of the ward in respect of which the election is being held.

Second.—That his claim to be a certain voter shown on the electoral roll is false.

Third.—That he has already voted.

29. The proceedure for recording each voter's vote shall be as follows :—

(*i*) As each intending voter enters the polling booth or room, his name and his number in the electoral roll shall be called out so that everybody present can hear them.

(*ii*) No objection to a voter shall be entertained except on the grounds mentioned in rule 28.

(*iii*) Such objection shall be summarily decided by the polling officer, who may for this purpose obtain such evidence as may be available on the spot.

(*iv*) If after taking such evidence the polling officer is satisfied that the voter is entitled to vote, he shall hand him the foil of a voting paper and allow him to proceed to vote.

(*v*) The number of the voter in the electoral roll shall be marked on the counterfoil of the voting paper.

(*vi*) The voter on receiving the voting paper shall forthwith proceed to the place set apart for the purpose and there mark a cross against the name of the candidate or candidates for whom he intends to vote. He shall then fold the voting paper so as to conceal his vote and shall put the voting paper, so folded up, into the ballot box. He shall vote without undue delay, and shall quit the polling station as soon as he has put the voting paper into the ballot box.

(*vii*) If the voter is unable to read the voting paper, or to make a cross thereon, the polling officer shall mark the vote on the voting paper according to the direction of the voter. The voter shall then put the voting paper folded up into the ballot box.

30. Before the commencement of the poll the presiding officer shall show the ballot box empty to such persons as may be present in a polling station. On the conclusion of the poll the ballot box shall be opened and the votes counted in the presence of the candidates or their agents by the polling officer and the polling officer shall then and there declare the result of the election and report accordingly to the Executive Officer. He shall also seal up the book of counterfoils and unused foils of voting papers and make it over to the Commanding Officer, who shall keep it sealed in his own custody till it is destroyed under rule 35.

31. Any voting paper which is not duly marked or on which a cross (or mark) is placed in such a manner as to make it doubtful to which candidate it has been given or on which any mark is made by which the voter may afterwards be identified shall be invalid.

32. If there be an equality of votes for the same vacancy, and if the number of vacancies does not admit of all the candidates who have obtained an equal number of votes being elected, the election of one of such candidates shall be made by lot to be drawn by the polling officer in such manner as he may determine.

33. In the event of any candidate being elected for more than one ward, he shall, within five days from the date of election, declare which ward he will represent; and if he fail to make such declaration, the Commanding Officer of the district shall forthwith declare the ward which such candidate shall represent, and in either case such candidate shall be held to be elected in the ward in respect of which either of such declaration has been made, and in every other ward in which the said candidate has been returned, the result of the election shall be determined as if no votes had been recorded for him, provided that if there is no other candidates for whom votes have been recorded to fill the vacancy thus caused, a fresh election shall be held.

34. When the voting papers have been scrutinized and counted they shall forthwith be replaced in the ballot box from which they were taken, and the box, after being locked and sealed with the cantonment seal, shall be kept by the Executive Officer in safe custody.

35. On the expiry of fifteen days from the date of declaration of the result of election, the voting papers in the ballot box and the sealed book containing unused voting papers and counterfoils in the Commanding Officer's custody shall be destroyed in the presence of such member of the Board or officers as the members at a meeting may appoint for this purpose.

36. The list of duly returned candidates for the whole cantonment shall be forwarded by the Executive Officer to the District Magistrate, who will forward the same to the Local Government for publication in the *Calcutta Gazette*.

VI.—Disputes.

37. All disputes arising under these rules shall be decided by the Commanding Officer, and his decision shall be final. A breach of these rules renders a person liable to the penalty provided by section 268 of the Act. The offence of personation, of undue influence and of bribery at an election are punishable under sections 171E and 171F of the Indian Penal Code, 1860, as amended by the Indian Elections Offences and Inquiries Act, 1920 (XXXIX of 1920).

Wave length.—450 and 800 metres.

Details.—Ships requiring bearings should call this directional finding station in accordance with the procedure outlined below, and the latter will reply giving the true bearing of the ship from the station, expressed in degrees (000°—359°).

The D-F station maintains continuous watch on the 600 metres wave ; bearings however will be taken either on 450 or 800 metres, as requested, and the reply transmitted on 600 metres.

The following signals are to be used :—

Signal.	Meaning.
QTE.	What is my true bearing from you ?
QTE.	Your true bearing from me was.....degrees.

Example.—The ship calls the D-F station in the usual manner on the 600 metres wave, making QTE ? in conjunction with the call signal of the station from which the bearing is required, followed by the figures 450 or 800, signifying that she will change to either the 450 or 800 metres wave for the taking of the bearing.

The ship then awaits instructions from the D-F station, which will be transmitted on the 600 metres wave.

In order to obtain the greatest possible degree of accuracy, it is important that ships should not transmit with too much power Signals should, however, be fairly strong and clear ; great care must be exercised to keep the note and strength steady, and to pay strict attention to spacing ; the instructions should be carefully observed.

Caution.—Although the bearings taken by the D-F station can generally be considered accurate within two degrees, it must be understood that the Hongkong Government provide this service on the condition that they incur no liability for any consequences resulting directly or indirectly from any inaccuracy in the bearings given, from any failure in the service, or from any other cause whatever.

The Director of Public Works, Hongkong, will be glad to receive periodical reports from ships on the results obtained.

For the present no charge will be made for the use of this station.

ANNUAL REPORT

OF THE

ROYAL BOTANIC GARDEN AND THE GARDENS IN CALCUTTA

AND OF THE LLOYD BOTANIC GARDEN, DARJEELING,

FOR 1923-24.

ROYAL BOTANIC GARDEN.

1. **General.**—The year under review has not been altogether favourable from the horticulturist's standpoint. During the early part of the hot season, and again towards the end of the cold, there was an almost entire absence of rain in consequence of which the garden took on a parched appearance and a larger part of the labour force than is usually employed in caring for potted plants and beds in the open, had to be detailed to do watering work. This was the more unfortunate that labour itself was none too plentiful and that financial considerations dictated the strictest economy in its employ. The results of the prolonged periods of drought were not immediately apparent on trees and shrubs already well established, but a number subsequently dried and will require replacing.

The dry spell at the end of the year unfortunately gave opportunity for a form of damage that has become serious and much too frequent of recent years. Whether from visitor's thoughtlessly throwing away lighted matches or as a result of deliberate wickedness on the part of evil doers is difficult to say, but quite an abnormal number of fires have taken place of recent months. Some of them are difficult to account for on the assumption that accident was responsible.

Fires are not likely to break out spontaneously or accidentally on islands inaccessible to the visiting public, yet a large island in the King Lake suffered severely one night as a result of what must have been deliberate incendiarism. The object gained, whatever it may be, by this form of crime, must be satisfying for some malcontents but it is poor recompense for those who have laboured to make the garden a beauty spot for the crowds of visitors who now frequent it. A check kept at all the entrances to the gardens one day during the cold weather showed a total of 1,540 visitors.

In spite of the discouragements above mentioned routine work directed to keep the garden in a fit and proper state went on throughout the year, and a certain amount of garden improvement was also found possible. This took the form of rearranging and restocking some of the plant houses. The Orchid house in particular having become dense and overgrown stood most in need of attention. The rearrangement brought about has added greatly to its attractiveness in rendering it lighter and opener and in allowing the eye to take in the general effect at a glance. New beds and rockeries have been prepared while a number of desirable shade-loving species have been added to the collections. Similar work in certain of the remaining plant houses will be undertaken as opportunity and funds allow.

In last year's report mention was made of the very unsatisfactory condition of the garden roads. There being no special allotment available for the purpose it became imperative to divert part of the now reduced grant under contingencies to their renovation. They had reached a state when public disapprobation was justified and when indignation was already expressed in the form of side paths on the grass lawns running parallel with the main avenues. Although the funds could ill be spared from other urgent items of garden improvement, an amount sufficient to remake the whole length of the Banyan and to patch up other avenues, was put aside and the work completed. To keep the miles of road under modern conditions of traffic in a state befitting garden surroundings generally would

leave little available for the host of other improvements awaiting funds; so while work of this description is and can be done from garden funds proper at a time of financial stress it should be emphasised that to do so permanently can only result in stagnation of garden improvement as a whole. Needless to say while the roads were tackled nothing could be done towards revetment of the river bank, another perplexing and extraneous drain on garden resources.

The general plant collections in the garden were reasonably well maintained. A display of *Cacti* and other succulents and of palm and ornamental foliage plants put up in the Eden Gardens in December and January was much visited and admired by the crowds who flocked to the exhibition. The display of cold weather annuals was quite up to standard as was also the collection of Orchids.

2. **Plant and seed exchange.**—Over 25,000 plants were distributed, of which 9,450 were trees for roadside and other planting, 6,900 were shrubs and about 7,000 palms and surplus annuals, the distribution being as usual to Government institutions, District Boards, Railways and Municipalities. Besides these, 200 packets and 40 lbs. of seed were distributed to various gardens, scientific departments and private individuals throughout the world Over 2,400 plants, mostly Orchids and bulbs, were received. The annual supply of mahogany seed from the West Indies did not reach the garden in germinable condition.

During the year two magnificent specimens of mahogany trees went from the Garden to the timber section of the British Empire Exhibition. They must date from the early history of the Garden, the annual rings in one proving this specimen to be well over 100 years old. Reports received states that the logs were too heavy to be dealt with entire. The intention was to put them into sections suitable for handling and to piece these together at the exhibition. Visitors from Bengal will be able to view a product unequalled in its line which has taken their province over a century to produce.

3. **Herbarium and Library.**—This section was under the care of Mr. Debbarman to whose industry and helpfulness acknowledgments are due. Valuable assistance was also rendered by Mr. V. Narayanswami of the Botanical Survey Department. Besides routine work on small collections, the early identification of which alone satisfies correspondents, and the more difficult work of attending to the large collections awaiting examination, some 7,300 named species were put into the herbarium during the year. About 1,200 sheets were out on loan in connection with work on provincial floras. The publication of Mr. Burkill's "Flora of the Abor Expedition", a work which will run to at least three numbers of the Records of the Botanical Survey, is responsible for the holding back from publication of several papers of botanical interest. the result of work in the herbarium and library by members of the staff.

Library work has gone on as usual, the accessions being confined as far as possible to periodicals for which standing orders exist in order that arrears of library debts might be wiped off.

4. **Publications.**—No purely garden publications appeared during the year. The distribution of Part II of Volume XII of the Annals of the Garden, as well as the Appendix to Volume XI, is now almost finished. Arrangements for the publication by Professor Martelli of work left by Signor Beccari have been under discussion. It is hoped that funds will be available to continue the monumental work on palms which Signor Beccari's death interrupted.

5 **Financial.**—Out of a total budget allotment of Rs. 66,742 for staff and permanent establishment Rs. 55,098 were spent, leaving a saving of Rs. 11,644 which was effected mainly by Rs. 10,360 being saved under pay of Superintendent and Curator of the Herbarium. The temporary establishment allotment of Rs. 30,000 was utilised in full and from Rs. 27,120 granted under other heads Rs. 1,500 were saved. The net savings under all heads for the year amounted to Rs. 13,144. Revenue being sale proceeds of surplus plants and foreshore rent amounted to Rs. 3,916.

Staff.—Lieutenant-Colonel A. T. Gage, C.I.E., I.M.S., was on leave throughout the year, during which time the writer officiated as Superintendent. Mr. P. M. Debbarman officiated as Curator of the Herbarium, Mr. W. V. North was Curator, Mr. S. N. Basu, Assistant Curator and Mr. M. Jones, Overseer, throughout the year. The Head Clerk, Babu S. K. Mitra, was on leave from 2nd January 1924 till the end of the year during which time his place was conscientiously filled by the seventh clerk, Babu A. T. Banerji. All officers and the clerical staff have performed their duties satisfactorily.

CALCUTTA GARDENS.

Until preparations for the exhibition began, work in these gardens followed the routine of previous years. From December onwards the appearance of the Eden Gardens was completely changed and after the close of the Exhibition much work became necessary to repair the inevitable destruction that had taken place. Help, wherever it could usefully be given, was extended to the Exhibition authorities during the period they remained in the occupancy of the garden.

The Dalhousie Square Garden suffered to some extent by the operations of the Improvement Trust in widening the street. Mr. Mitra, the Assistant Curator in charge of these gardens, deserves praise for the manner in which he carried out his multifarious duties, his work for the horticultural section of the Exhibition in particular being worthy of mention. The allotment for all these gardens was Rs. 31,976 on which there was a small net saving of Rs. 104.

LLOYD BOTANIC GARDEN, DARJEELING.

The rainfall for the year was about 26 inches in defect, but, as the rain was well distributed throughout the rainy season, this shortage was not productive of any ill effects. With regard to the work, the year may be characterised as one of severe struggle against adverse conditions. Apart from difficulties of a financial nature, against which the Lloyd Botanic Garden is having its struggle in common with many other departments, there have been difficulties of a nature associated with gardening in particular. Thus a simple order concerning milk on the part of the municipality had the effect—no doubt quite unsuspected by that body—of practically wiping out the trained malis of Darjeeling in so far as their garden work was concerned. A student of social conditions would find this a curious and interesting item of study, but it is a real hardship to one having charge of gardens, as the training of lads has to be commenced *de novo* and with unpromising, sometimes unwilling, material. There are also noticeable tendencies on the part of that class, from which malis used to be recruited, to drift from one occupation to another, to shun steady industry in a spirit of get-rich-quickly and to develop an attitude of impatience to restraint and discipline. Gardening is not a profession that can be taught in a few months, and the years of plodding work required to make any headway do not appeal to a class who see few and insufficient inducements offering and who may be feeling that changes are impending which may result in their being required to find employment other than that in which they will have trained themselves to be useful.

The above conditions notwithstanding, the Curator, Mr. Cave, has done best to maintain the garden and its collections of plants in good order and to add to the latter so far as possible. Stocks are again plentiful both for garden use and for distribution and it may be claimed that the garden is a place of pleasure and interest at any season of the year.

Some 136 species new to the garden were planted out and the collection and distribution of seeds of plants indigenous to the district continues. Requests for these seeds are now received from a world-wide area. One correspondent has informed another until facilities offered by the Lloyd Botanic Garden in the matter of procuring Eastern Himalayan seed would seem to have become generally known. It would be well that the facilities now offered were taken advantage of while the present Curator continues in office. With his retirement, now at no very distant date, Government loses an officer, whose knowledge of the local flora is unrivalled, and the botanical world services that would take one with aptitude for them years of industry to successfully render.

NOTIFICATION.

No. 10857A.—The 17th September 1924.—Whereas the Commissioners appointed under rule 36 (*2*) (*a*) of the Bengal Electoral Rules to enquire into the petition presented by Maulvi Abdul Hakim Mukhtar against the election of Mr. Altaf Ali to the Bengal Legislative Council have reported to His Excellency the Governor that they have permitted the said Maulvi Abdul Hakim Mukhtar, after application duly made, to withdraw his petition :

Now, therefore, in accordance with the provisions of rule 45 (*3*) of the said rules, the following report of the said Commissioners is published for general information. His Excellency the Governor is pleased further to order that in accordance with the recommendations of the said Commissioners, the petitioner shall pay to respondent No. 1, Mr. Altaf Ali, Rs. 150 as pleaders' fees and also the costs incurred by the said respondent in court and process fees and witnesses' expenses.

A. N. MOBERLY,
Chief Secretary to the Government of Bengal (offg.).

In the Court of the Commissioners appointed under Rule 36 (2) (a) of the Bengal Electoral Rules.

PRESENT :

Dr. A. Suhrawardy, Bar.-at-Law ... ... *Respondent No. 2.*

Report.

This was a petition made by the petitioner, Maulvi Abdul Hakim Mukhtar, for setting aside the election of respondent No. 1, Mr. Altaf Ali, to the Bengal Legislative Council by the Mymensingh East Muhammadan Constituency at the last general election. The petitioner and the two respondents were the rival candidates. The main ground on which this petition was made, was that the election of respondent No. 1 had been secured by corrupt practices and undue influence. The petition was opposed by respondent No. 1. After we had settled the points for determination, the petitioner, on the 23rd of

June last, applied to withdraw from the case. A notice of the application for withdrawal was accordingly published, under Rule 39 (3) of the Bengal Electoral Rules, in the *Calcutta Gazette*, dated the 9th of July last. On the 28th of July last the pleaders for the petitioner and the respondent No. 1 were heard, with reference to the application for withdrawal. The main ground on which the withdrawal was prayed for, was that the election petition was defective, inasmuch as the allegation that illegal gratification had been promised by respondent No. 1 to the petitioner was not a fact, as only a proposal to that effect had been made. It was also urged that, owing to the alleged illness of the respondent No. 2, Dr. A. Suhrawardy, the petitioner was unable to secure this respondent's evidence. In our opinion, there was no reason for withholding permission to withdraw, with reference to Rule 39 (4) of the Bengal Electoral Rules, and by our order, dated the 28th of July last, we accordingly granted the application for withdrawal, directing the petitioner to pay to the respondent No. 1 Rs. 150 as pleaders' fees and also the costs incurred by the respondent No. 1 in court and process fees and witnesses' expenses.

We, further, directed that a notice of the withdrawal was to be published in the *Calcutta Gazette*, under Rule 39 (5) (b) of the rules. That notice was published in the *Calcutta Gazette*, dated the 6th of August 1924, and the matter was put up before us to-day. As fourteen days have expired since the publication of that notice, as required under Rule 39 (5) (c) of the rules, and as no one has appeared to be substituted in the place of the petitioner, no further action is necessary on our part. We are, therefore, of opinion that the election petition should accordingly be treated as dismissed, with costs, as noted above, and we beg to recommend accordingly to His Excellency the Governor of Bengal.

M. YUSUF, *President.*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill further to amend the Indian Penal Code and the Code of Criminal Procedure, 1898, for the purpose of affording greater protection to persons under the age of eighteen years was presented to the Legislative Assembly on the 10th September 1924 :—

We, the undersigned, Members of the Select Committee to which the Bill further to amend the Indian Penal Code and the Code of Criminal Procedure, 1898, for the purpose of affording greater protection to persons under the age of eighteen years, was referred, have considered the Bill and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

2. One very radical change which we have decided to make in the Bill is the omission of clauses 6 and 7, which proposed to insert in the Code of Criminal Procedure, 1898, new clauses 552A, 552B, 552C and 552D and certain consequential amendments. These clauses contained provisions enabling Magistrates to rescue minor girls from surroundings in which they would be liable to moral contamination and to make them over to suitable guardianship. After detailed examination of these clauses, we have arrived at the conclusion that it would be necessary to amplify them by the insertion of provisions dealing carefully with such matters as maintenance and marriage, and that provisions of this nature are not suitable for inclusion in a Criminal Procedure Code. We think that adequate and satisfactory provision could only be made by a separate measure containing provisions similar to those of the English Children Act of 1908, and we strongly recommend that a Bill on those lines should be presented to the Legislature at as early a date as possible.

3. We have scrutinized the remaining five clauses of the Bill in minute detail, and have discussed them at considerable length. In the result, we have left them substantially unaltered. We propose only two amendments, one in clause 2 and the other in the second *Explanation* proposed to be inserted by clause 3 in section 372 of the Indian Penal Code.

The amendment in clause 2 is purely consequential upon the passing of Act V of 1924 which substituted the age of eighteen for the age of sixteen in sections 372 and 373 of the Indian Penal Code.

The amendment in clause 3 is a drafting amendment designed merely to make more clear the intended meaning of the words "or communities, as the case may be," in the Bill as introduced. On the point of substance, we consider it desirable not to protect from the mischief of sections 372 and 373 of the Indian Penal Code persons who obtain, or help others to obtain, girls under the age of eighteen years with a view to their entering into a union which is not recognised as regular by the custom of the community or of both the communities, as the case may be, to which the parties to it belong. In arriving at this view we have rejected a suggestion that the only unions to be protected should be those between members of the same community and another suggestion that a union should be protected as long as it is sanctioned by the custom of the community of the girl who is one of the parties thereto.

4. The Bill was published in the Gazette of India, dated the 16th February 1924.

5. We think that the Bill has not been so altered as to require re-publication, and we recommend that it be passed as now amended.

MINUTES OF DISSENT.

Explanation No. I to sections 3 and 4 do not cover the whole position. They leave loopholes which are likely to frustrate the real object of the Bill. Explanation No. I to section 3 runs as follows:—"When a female under the age of eighteen years is sold, *let for hire*, or *otherwise disposed of* to a prostitute or to any person who keeps or manages a brothel, etc., etc." Presumption as to the intention with which the minor is sold, let for hire, or otherwise disposed of would not extend to cases not covered by the words contained in the Explanation. The result would be that all prostitutes or brothel keepers who want to get hold of minor girls would do so, taking all precautions to show that they engage them as servants. For want of a legal presumption in such cases, it will be almost impossible for the prosecution to show that the real intention was not only service, but something else with a criminal liability.

The same objection holds good in the case of Explanation I to section 4, which contains the words "who *buys*, *hires* or *otherwise obtains possession* of a female under the age of eighteen years shall, until the contrary is proved, be presumed to have obtained possession of such female with the intent, etc., etc."

The words "obtain possession" cannot cover the case of engaging in service. The object of this Explanation can also be defeated in the same way, unless we add the words "is engaged in service" after the words "let for hire" in Explanation I to section 3, and add the words "engages in service" after the word "hires". This is the only way to see the object of the measure fulfilled. Moreover, it is not very desirable to see young girls in the service of immoral girls or in immoral surroundings. In case it is satisfactorily proved that a particular case is that of service with no other underlying intention, the Magistrate concerned would decide in favour of the accused. It is absolutely necessary to raise a legal presumption of guilty intention in cases apparently shown to be of service only. Unless we do away with this loophole, this legislation would be perfectly ineffectual.

Section 5.—While dealing with sections 372 and 373 as compared with section 552 in so far as the question of age of consent is concerned, legislation has already allowed a difference of two years. Sections 372 and 373 as originally enacted protected minors under the age of sixteen; and while dealing with section 552 empowered Magistrates to restore minors under the age of fourteen only in case of detention for unlawful purpose. That was an anomaly. Following the same anomaly the present Bill keeps up that difference of two years, for which there seems to be no other reason excepting that such a difference already existed. The reason does not appeal to my mind. If the legislation is bent upon protecting minor girls, the age up to which a minor girl can be restored to the lawful guardian in case of her detention for an unlawful purpose should be the same, *i.e.*, eighteen and not sixteen. The legislation, if having a set object before it, should be consistent and not inconsistent.

GULAM BARI.

It looks to me that the words "at any age" occurring in clause 2 ought to be removed. It has no meaning if after the age of 18, a girl is employed, etc., for the purposes mentioned as she is free to act as she pleases.

Protection for acts done under Act.

13. No suit or other legal proceeding shall be instituted against any person in respect of anything which is in good faith done or intended to be done under this Act.

STATEMENT OF OBJECTS AND REASONS.

The Indian Cotton Committee which was appointed in 1917, in Chapter XVI of their Report recommended certain measures, including the licensing of cotton ginning and pressing factories, to prevent such malpractices as damping, mixing and adulteration, which are injurious to the quality and reputation of Indian cotton. The recommendations of the Committee, however, involved an excessive amount of official interference. The object of the present Bill is to put the trade in a position to protect itself by providing for the marking of bales and the record of ownership, and by providing further that unmarked bales are not tenderable in fulfilment of a contract, if marked bales are demanded by the purchaser.

The Bill also makes provision for the maintenance of registers for statistical returns, for the use of correct scales and weights, and for the structural improvement of ginning and pressing factories. The Bill is based on the recommendations of the Indian Central Cotton Committee, and is supplementary to the Cotton Transport Act, 1923.

Call signal.—VPS.

Wave length.—450 and 800 metres.

Details.—Ships requiring bearings should call this directional finding station in accordance with the procedure outlined below, and the latter will reply giving the true bearing of the ship from the station, expressed in degrees (000°—359°)

The D-F station maintains continuous watch on the 600 metres wave ; bearings however will be taken either on 450 or 800 metres, as requested, and the reply transmitted on 600 metres.

The following signals are to be used :—

Signal.	Meaning.
QTE.	What is my true bearing from you ?
QTE.	Your true bearing from me was.....degrees.

Example.—The ship calls the D-F station in the usual manner on the 600 metres wave, making QTE ? in conjunction with the call signal of the station from which the bearing is required, followed by the figures 450 or 800, signifying that she will change to either the 450 or 800 metres wave for the taking of the bearing.

The ship then awaits instructions from the D-F station, which will be transmitted on the 600 metres wave.

In order to obtain the greatest possible degree of accuracy, it is important that ships should not transmit with too much power Signals should, however be fairly strong and clear ; great care must be exercised to keep the note and strength steady, and to pay strict attention to spacing ; the instructions should be carefully observed.

Caution.—Although the bearings taken by the D-F station can generally be considered accurate within two degrees, it must be understood that the Hongkong Government provide this service on the condition that they incur no liability for any consequences resulting directly or indirectly from any inaccuracy in the bearings given, from any failure in the service, or from any other cause whatever.

The Director of Public Works, Hongkong, will be glad to receive periodical reports from ships on the results obtained.

For the present no charge will be made for the use of this station.

DEPARTMENT OF AGRICULTURE, BENGAL.

Preliminary forecast of the *bhadoi* crops of Bengal, 1924-25.

(NOTE.—On an average of the five years ending 1922-23, the area under autumn rice in Bengal has represented some 6·2 per cent. of the total area under rice in British India.)

Character of the season.—The rainfall at the outset was somewhat insufficient for the preparatory tillage and the long spell of drought that followed from March to the middle of April proved generally unfavourable to the crops at sowing time. From the latter part of April to the early part of May the rainfall proved beneficial, but unprecedentedly high temperatures later on adversely affected growth, especially in the high land tracts. Since then, with the break of the monsoon in the middle of June, condition and prospects have generally improved except in parts of West Bengal where insufficient rain has proved detrimental. Excessive rain and sudden rise of rivers in July and August have caused some damage to mature crops in low land tracts of East Bengal districts. On the whole, the season is expected to be satisfactory in North Bengal and, excluding flood damage, fair in West and East Bengal.

Acreage.—The total area sown with the different *bhadoi* crops this year is reported to be 5,539,400 acres as against 5,742,200 acres and 5,767,500 acres, respectively, in the corresponding and final forecasts of last year. Of this the area under autumn rice is estimated at 4,789,900 acres as against 4,963,000 acres and 5,9[illegible]1,000 acres, respectively, in the corresponding and final forecasts of last year.

Outturn.—According to the District Officers' estimates, the outturn of the different *bhadoi* crops for the Presidency works out at 65 per cent. of the normal as against 79 and 77 per cent. reported respectively in the corresponding and final forecasts of last year. The autumn rice yields an outturn of 64 per cent. of the normal for the Province this year as against 77 per cent. reported both in the corresponding and final forecasts of last year.

Director of Agriculture, Bengal (offg.).

The increase in area as compared with last year is due to favourable weather at sowing time. The weather has not been favourable. A. G. MAFLIN,

Personal Assistant to the Secretary to the Government of Bengal.

CALCUTTA, *the 19th September 1924.*

DEPARTMENT OF AGRICULTURE, BENGAL.

Monthly Weather and Crop Report of Bengal for August, 1924.

I. **Character of the season.**—The rainfall of the month was unevenly distributed throughout the province, the fall being above the average in twelve districts and below normal in the rest. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Transplantation of winter paddy seedlings was going on favourably except in parts of West Bengal and the Presidency, where it has been seriously delayed owing to lack of water. Reaping of autumn paddy and cutting, steeping and washing of jute were proceeding satisfactorily.

III. **State of standing crops.**—The standing crops were doing well except in some low land tracts of East Bengal, where continuous rain and flood adversely affected them.

IV. **Prospects and probable outturns.**—The prospects of autumn paddy were injured in parts of West and East Bengal, by drought in the former and by heavy rain and flood in the latter. The outlook of the transplanted paddy, so far, is promising except in some high land tracts, where more rain is required for its growth.

V. **Damage to standing crops.**—Some damage to autumn and deep-water winter paddy and jute was caused by excessive rain and flood in the low land tracts of East Bengal.

VI. **Condition of agricultural stock.**—The condition of live-stock was generally fair. Sporadic cases of cattle disease were, however, reported from parts of the 24-Parganas, Murshidabad, Birbhum, Bankura, Howrah, Darjeeling, Rangpur, Chittagong, Tippera, Cooch-Behar and Tripura States.

VII. **Failure of pasturage and fodder.**—No scarcity of fodder and water was reported from any part of the province.

VIII. **Prices of food-grains.**—During the second half of the month under review the price of common rice of the cheapest quality rose in eight districts, fell in six and remained stationary in the rest of the province. It ranged from 4 seers 12 chittaks per rupee at Tippera to 7 seers 8 chittaks per rupee at Rajshahi.

IX. **Condition of agricultural population.**—The condition of agricultural population is reported to be fair.

Director of Agriculture, Bengal (offg.).
